

Spudich, A.J., Gerhart, J., McKnight, S.L., Schekman, R.(ed.): **Annual Review of Cell Biology and Developmental Biology. Volume 11.** - Annual Reviews Inc., Palo Alto 1995, 732 pp. USA 49.00 \$, other countries 54.00 \$.

The change of the name of the series (originally only Annual Review of Cell Biology) reflects the importance of considering cell biology and developmental biology as a single enterprise. The following topics are covered: Yeast vacuolar protein sorting, Hematopoietic stem cells, Vasculogenesis, The nucleolus, Keratins and the skin, Nuclear import, *Drosophila* gastrulation, Intracellular bacterial pathogens, Biological atomic force microscopy, MHC class II antigen presentation, Development/Function of TCR $\gamma\delta$ cells, Transcriptional regulation by cAMP, Focal adhesions, Neural messenger nitric oxide, Heat shock transcription factors, Budding yeast kinetochores, Control of actin assembly at filament ends, Silencing and heritable domains of gene expression, Integrins, Carbohydrate-protein interactions, Unconventional myosins, and COPs regulating membrane traffic. The reviews include extensive references to the literature and are written in such a way, as to be valuable both to advanced students and scientist. The Annual Review of Cell Biology and Developmental Biology is published since 1985 by a non-profit scientific publisher. Thus the price of this volume is comparatively low compared to other similar publications. For copies of individual articles published in the Annual Review, or copies of any article cited in the Annual Review write to Annual Reviews Preprints and Reprints, P.O.Box 4327, Burlingame, Ca 94011-4327, e-mail: arpr@class.org.
