

Spudich, A.J., McKnight, S.L. and Schekman, R.(ed.): **Annual Review of Cell Biology. Volume 10.**
- Annual Reviews Inc., Palo Alto, 1994. 478 pp. USA US\$ 49.00, other countries US \$ 54.00.

This volume is dedicated to George Palade, who established the Annual Review of Cell Biology and has retired as Editor. The following topics are covered: The retinoblastoma protein, GTP-binding proteins and the actin cytoskeleton, Protein serine/threonine phosphatases, SRP-dependent protein targeting, Vertebrate limb development, Cortical microtubules and development, Ras-related GTPases and cell membranes, Structure of Actin binding proteins, Receptor protein-tyrosine kinases, Dyneins: structure and function, Amyloid protein-Alzheimer's disease, and Structure, regulation and function of NF- κ B proteins. The reviews include extensive references to the literature and are written in such a way, as to be valuable both to advanced students and scientist.

The Annual Review of Cell Biology is published since 1985 by a non-profit scientific publisher. Thus the price of this volume is comparatively low compared to other similar publications. For copies of individual articles published in the Annual Review, or copies of any article cited in the Annual Review write to Annual Reviews Preprints and Reprints, P.O.Box 4327, Burlingame, Ca 94011-4327 or email address: arpr@class.org.
