

Table 1 Suppl. Provenances of *Eucalyptus cladocalyx* evaluated in Choapa Province, northern Chile.

Provenance	Families	Latitude [S]	Longitude [E]	Annual precipitation [mm·y ⁻¹]
Flinders Chase	8	35° 57'	136° 42'	637.9
Marble Range	4	34° 30'	135° 30'	485.1
Mount Remarkable	16	32° 43'	138° 06'	242.8
Cowell	10	33° 38'	136° 40'	405.0
Wirrabara	9	33° 06'	138° 14'	256.6

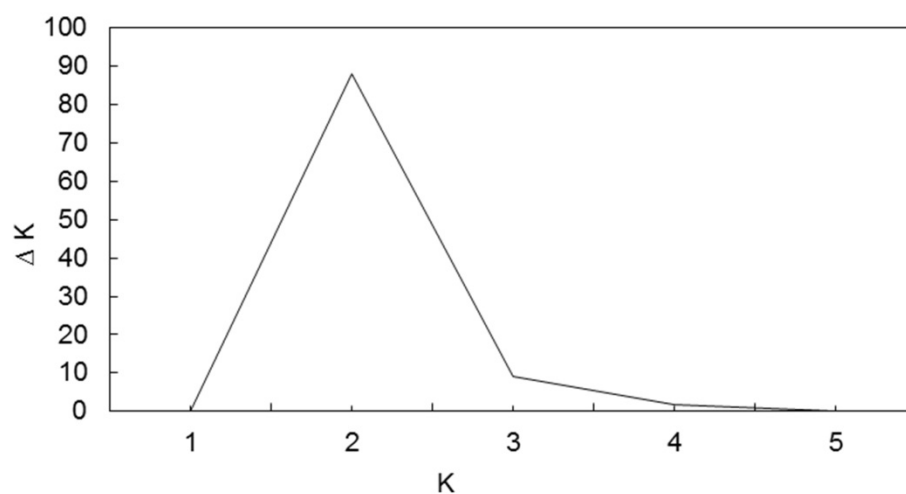

Fig. 1 Suppl. Determination of the most probable number of groups (K) using the Evanno *et al.* (2005) method. The most probable number of subpopulations in the sample was two (K = 2), it assumed no-admixture and independent alleles frequency model.
