Fig. 1 Suppl. Schematic representation of reciprocal JNK tandem repeats and R173 sequences arrangement; JNK sequence at 5' end of the block is truncated; arrows indicate the orientation of the sequences.

A - Comparison of 989 bp fragment (Query) to R173-3 and JNK. The fragment was amplified with revGW3 and AP-2 primers. Sequences JNK and R173 are adjacent in parallel orientation.
B - Comparison of 964 bp fragment (Query) to JNK and R173-3. The fragment was amplified with forGW3 and AP-2 primers. Sequences JNK and R173 are adjacent but in antiparallel orientation.
