

Spudis, A.J., Gerhart, J., McKnight, S.L., Schekman, R. (ed.): **Annual Review of Cell and Developmental Biology**. Volume 14. - Annual Reviews Inc., Palo Alto 1998. 560 pp. Price individual USA \$ 64.00, elsewhere \$ 69.00, institutional USA \$ 128 00, elsewhere \$ 138.00. ISBN 0-8243-3114-1.

Volume 14 in the Annual Reviews series is a comprehensive collection of reviews on the latest advances in basic and applied cell and developmental research that integrates biology, chemistry and physics. The following topics are covered: Polypeptide signal systemin, Ubiquitin and protein trafficking, WNT signalling, Tight junction, Functions of lipid drafts, Pathogens and actin cytoskeleton, Muscle gene regulation by MEF2, Bioluminescence, Phosphoinositide lipids as signaling molecules, Mitochondrial dynamics in yeasts, Signaling to the actin cytoskeleton, Isoform sorting and cell compartments, Specifying leaf identity, Control of translation initiation in animals, Intracellular signaling from the endoplasmic reticulum to the nucleus, and Filament length regulation. The reviews include extensive references to the literature and are written in such a way, as to be valuable both to advanced students and scientist.

The Annual Review of Cell Biology and Developmental Biology is published since 1985 by a non-profit scientific publisher. Thus the price of this volume is comparatively low compared to other similar publications. Mail orders, 4139 El Camino Way, P.O. Box 10139, Palo Alto, CA 94303 USA; e-mail: service@annurev.org. Abstracts available at <http://www.annualreviews.org>.
