

Campbell, A., Anderson, W.W, Jones, E.W. (ed.): **Annual Review of Genetics. Volume 38.** - Annual Reviews Inc., Palo Alto, California, 2004, 878 pp. ISBN 0-8243-1238-4.

The readers of *Biologia Plantarum* will be mainly interested in the reviews: The genetics of maize evolution (J. Doebley), Light signal transduction in higher plants (M. Cheng and C. Funkhauser), *Chlamydomonas reinhardtii* in the landscape of pigments (A.R. Grossman *et al.*), Recombination proteins in yeast (B.O. Krogh and L.S. Symington), Genetic models in pathogenesis (E. Pradel and J.J. Ewbank), Mechanisms of pattern formation in plant embryogenesis (V. Willemsen and B. Scheres), and Species specificity in pollen-pistil interactions (R. Swanson *et al.*).

Other topics covered in this Volume: Mobile group II introns, Retroviral host genetics, Genetics of geochemistry, Cde14 phosphates, Developmental gene amplification, Function of nuclear architecture, Melanocytes and microphthalmia transcription factor network, Polycomb/trithorax and cellular memory,

Repair of endogenous DNA damage, Mitochondria of protists, Genomic analysis of microbial communities, Genomic imprinting and kinship, Gene duplication and divergence, Genetic analysis from ancient DNA, Prion genetics, Proteolysis as a regulatory mechanism, MAP kinase signalling specificity, iRNA transcription in *E. coli*, Bacterial genome structure, and Adenin-associated virus a recombinant vectors. The reviews include extensive references to the literature and are written in such a way, as to be valuable both to advanced students and scientist.

The Annual Review of Genetics is published since 1967 by a non-profit scientific publisher. Thus the price of this volume (especially the Individual) is comparatively low compared to other similar publications. The Annual Review of Genetics is online at <http://genet.annualreviews.org>
